

## Produce and Share your Video to YouTube Step by Step

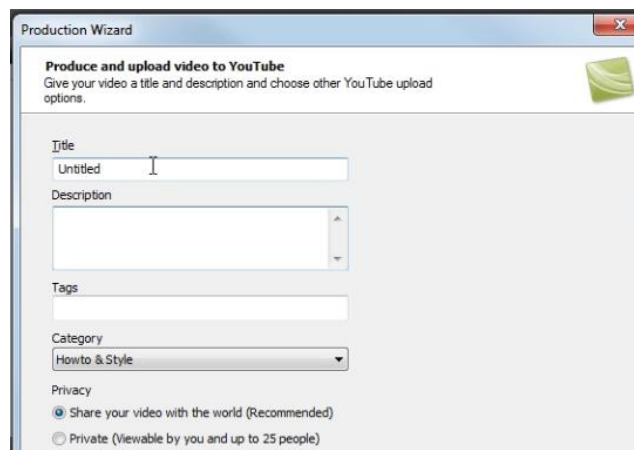

When you have completed your editing and are ready to produce and share, expand the drop down menu Produce and Share and select Share to YouTube...

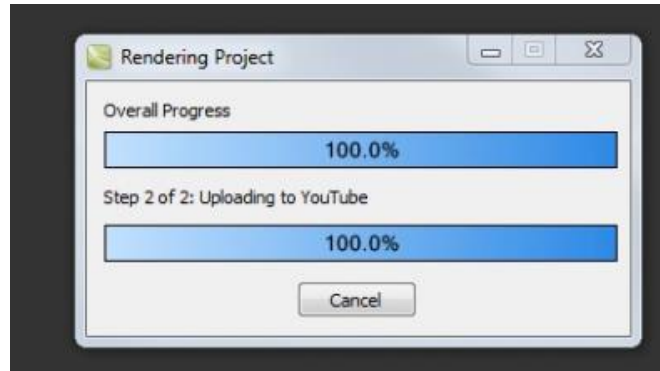

You will then be prompted to sign into your YouTube account, enter your user name and password.

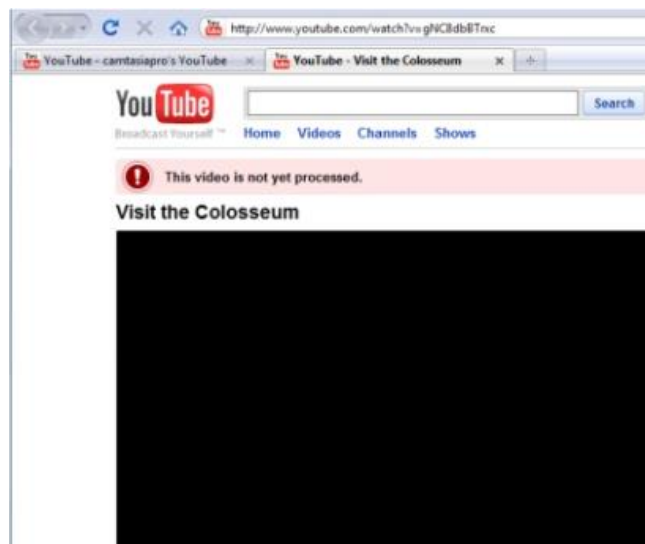

A screenshot of a dialog box titled 'Production Wizard' with the subtitle 'Sign In To YouTube.com'. The text below the subtitle reads 'Sign in to YouTube with your YouTube or Google Account credentials.' There are two input fields: 'User name:' and 'Password:'. Below the password field is a link that says 'Forgot your password?'. At the bottom left, there is a checkbox labeled 'Remember me' which is currently unchecked.

Once you are logged in, give your video a title and description. You can add tags if you wish and select a category from the menu. Here you are able to also select the privacy for your video. When you are done with that, click Finish and Camtasia studio will do all the work for you and uploads it directly to your YouTube account.

A screenshot of a dialog box titled 'Production Wizard' with the subtitle 'Produce and upload video to YouTube'. The text below the subtitle reads 'Give your video a title and description and choose other YouTube upload options.' There are several input fields: 'Title' (with 'Untitled' entered), 'Description' (a text area), 'Tags' (a text field), and 'Category' (a dropdown menu with 'Howto & Style' selected). At the bottom, there is a 'Privacy' section with two radio buttons: 'Share your video with the world (Recommended)' (which is selected) and 'Private (Viewable by you and up to 25 people)'.

Note that your video might not be immediately available.

Refresh the screen in a few minutes. This is the link that you can copy and place into your course.
