

## Tips Prior to Recording Step by Step

### Tip 1: Clean up your computer

Make sure what your viewers are seeing on your desktop isn't distracting. Try closing any applications that you are not using. If you are recording your full screen you don't have to worry about this.

### Tip 2: Write a Script

Writing a script out will help you organize everything you want to include in your video. This will eliminate a lot of ummm's, jumping around and help you stay focus on the goal ahead. In addition to writing the script, it helps to do a practice run through of your recording.

### Tip 3: Record the Best Audio Possible

Use a decent USB microphone for better sounding audio and a quiet setting. Be aware of your surroundings, stay away from vents, doors, etc.
